## U GRO Capital launches 'GRO Micro', expands its network by 25 branches; aims to support 50,000 small businesses by FY'22

- Expands its branch network in Karnataka, Tamil Nadu, Gujarat, Telangana and Rajasthan
- Intends to expand the reach of GRO Micro branches to 100 by end of FY '22
- The company aims to reach out to 50,000 small businesses during the year

U GRO Capital, a BSE listed, sector focused small business lending fintech platform, today, announced the launch of '**GRO Micro**', a dedicated distribution channel to aid lending services specifically for the unorganized Micro Businesses based in non-metro markets. The Company announced that it has expanded its distribution network by adding 25 branches across 5 states - Karnataka, Tamil Nadu, Gujarat, Telangana, and Rajasthan.

With this geographical expansion under the flagship of 'GRO Micro', the Company aims to offer small ticket loans – secured against property, as well as unsecured loans, to micro businesses, for help them in

1. Sustenance and stability in the post pandemic era,
2. Meeting their Working Capital needs to fix broken cash flows and
3. To cater to their business expansion needs

U GRO Capital started its journey after it shortlisted 8 sectors and 38 sub-sectors, basis an 18-month process involving extensive study of macro and micro economic parameters carried out in conjunction with market experts like CRISIL. The eight sectors shortlisted were Healthcare, Education, Chemicals, Food Processing / FMCG, Hospitality, Electrical Equipment and Components, Auto Components, Light Engineering and Micro Loans. Using its first-hand lending experience and insights drawn from use of advanced data analytics, the Company added Micro Enterprises as an additional sector in itself within the 2nd year of its operations.

Based on its internal research, the Company found that there exists an opportunity to connect with over **5 million** MSMEs in target markets, away from the urban centers. These small businesses in Tier 2 and 3 regions face a lack of formal capital infusion due to insufficient database and unavailability of requisite documents. This sector alone presents a huge market opportunity prompting the Company to launch a dedicated vertical called **GRO Micro** to cater to these businesses.

The company aims to bridge this credit gap effectively, by providing its customized lending services to the MSMEs. U GRO Capital has a robust and highly capable technology enabled underwriting model, for which it has also filed a patent. It plans to combine this model with its deep digital architecture, facilitated by its capabilities in AI/ ML leveraging traditional and alternate data sources, to offer credit in a quick and convenient manner.
